

**Product parameters**

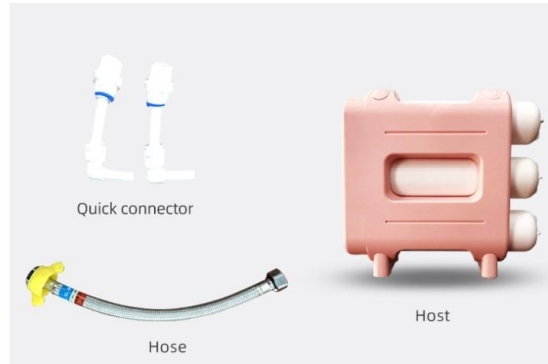

Model	Wash Beauty Super Filter Water Purifier	Applicable water source	Municipal tap water
Purified water flow	1.5L/Min	Applicable water temperature	5-30°C
Rated total net water volume	2 M³	Filtration accuracy	0.01(UM)
Work pressure	0.1-0.3MPA	Outlet	3/8" Diameter Water Pipe

## Nice Packing

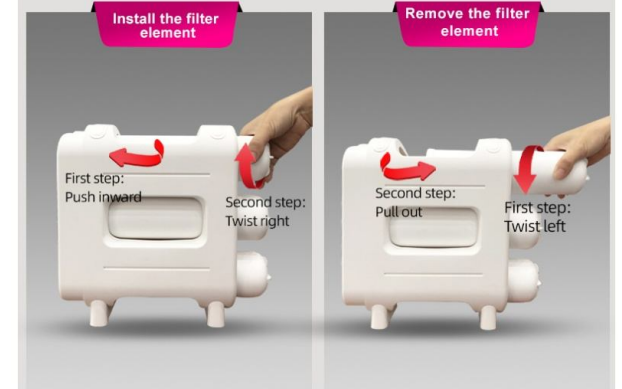

Exquisite color portable packaging

## Product details

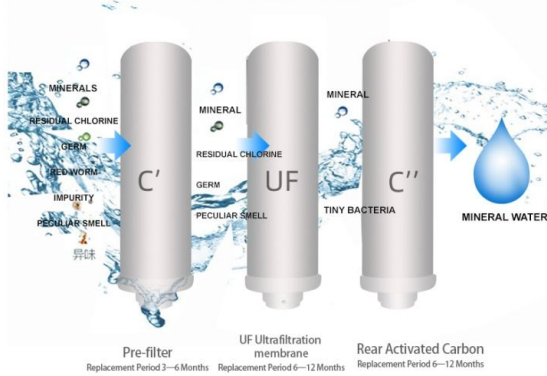

3s  
QUICK CHANGE

## HIGH-END FILTRATION

KEEP TRACE ELEMENTS AND BENEFICIAL MINERALS IN WATER

RETENTION OF TRACE ELEMENTS AND BENEFICIAL MINERALS IN WATER

### First Level

PP Cotton Filter Element

To intercept large particles such as sediment particles and iron embroidery, we adopt innovative folding design to reduce the volume but greatly increase the filtering area, which can effectively filter out large particles of impurities such as sediment, iron embroidery, bloodworms, hair, and fibers. Suggested replacement period: 3-6 months

### Second Level

UF Ultrafiltration Membrane Filter Element

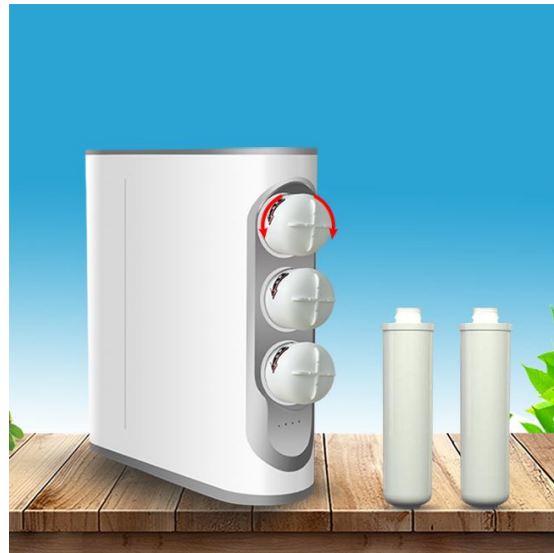

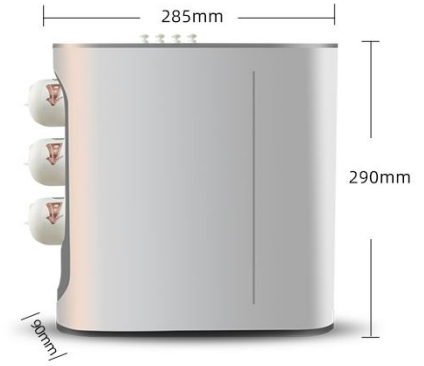

Effectively remove residual chlorine, odor, color, hypochlorous acid, chloroform, hydrogen ammonia, carbon tetrachloride, phenol, etc.

**Third Level**  
Rear carbon rod filter

To improve the taste, the carbon rod filter element is placed after the inlet is cleaned, and the same filter material as the front carbon rod filter element is used to further purify the residual odor in the water and improve the taste, making the purified water more clear and delicious when drinking.  
Replacement Period 6—12 Months

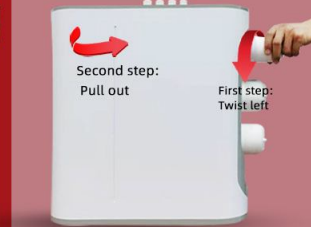

Easily change the core in 5 seconds at home  
Get rid of the trouble of after-sales appointment

Install the filter element

Remove the filter element

Second step: Pull out

First step: Twist left

3s

Meet water needs in 3  
No need to wait

RO

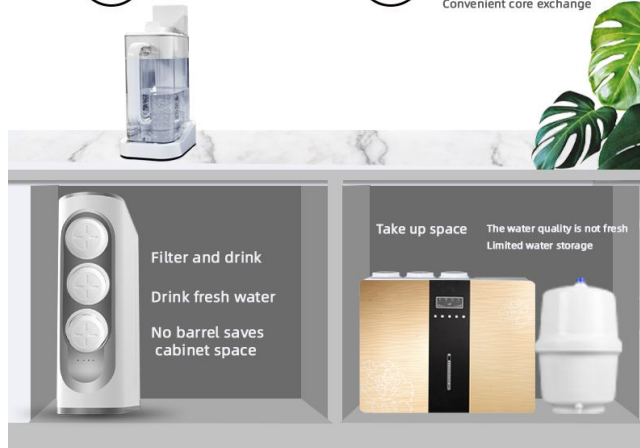

RO reverse osmosis membrane  
More clean water, less waste water

1:1

1:1 low wastewater ratio  
Meet the different water needs of the family

i

Pull-out filter  
Autonomous replacement  
Convenient core exchange

RO Pure Water Machine

Water in a second

Filter and drink

Pull-out filter

Three-stage filtration
